Lombardia**

UNIVERSITÀ
DEGLI STUDI
DI MILANO

Preliminary Program

Welcome to

A day in the Small Bowell **vol. III**

the live experience

Enteroscopy radically changed the diagnostic and therapeutic approach to the pathologies of the small bowel and, nowadays, represents an essential step in the management of mid gut bleeding. Moreover, enteroscopy is becoming more and more relevant in the management of inflammatory bowel diseases, refractory celiac disease and small bowel tumors.

The amount ongoing researches and the continuous technological update make necessary a frequent update for the professionals working in the field.

The aim of the proposed course is to provide a series of lectures and a live session made by renowned experts; the most relevant topics in wired and wireless enteroscopy will be discussed.
